Modular Boys Characters

Thank you for purchasing this collection.

--- FOLDER STRUCTURE ---

Documents: Contains this ReadMe file.

Materials: PBR materials assigned.

Models: 3D meshes for all prefabs.

Prefabs: Ready-to-use game objects with materials pre-applied. Drag and drop these into your scene.

Scene: Includes all Demo scenes to showcase all assets in one layout.

Textures: PBR texture maps.

--- ASSET LIST (1 UNIQUE CHARACTER + EXTRA PROPS) ---

Boy Character: vertices: 19,320 triangles: 33,154

Backpack: vertices: 1,417 triangles: 2,644

Dress: vertices: 6,935 triangles: 13,566

Glasses1: vertices: 362 triangles: 660

Glasses2: vertices: 394 triangles: 712

Hair1: vertices: 5,104 triangles: 10,016

Hair2: vertices: 1,901 triangles: 3,396

Hair3: vertices: 1,931 triangles: 3,766

Hair4: vertices: 2,562 triangles: 5,108

Pants1: vertices: 550 triangles: 1,052

Pants2: vertices: 512 triangles: 978

Pants3: vertices: 642 triangles: 1,239

Pants4: vertices: 1,163 triangles: 2,216

Scarf: vertices: 5,728 triangles: 11,293

Shoes1: vertices: 2,152 triangles: 4,264

Shoes2: vertices: 3,148 triangles: 5,916

Shoes3: vertices: 3,278 triangles: 5,974

Shoes4: vertices: 1,388 triangles: 2,740

Shoes5: vertices: 2,356 triangles: 4,570

Top1: vertices: 1,192 triangles: 2,238

Top2: vertices: 989 triangles: 1,908

Top3: vertices: 2,123 triangles: 4,091

Top4: vertices: 1,623 triangles: 2,981

Under Wear: vertices: 648 triangles: 1,212

TOTAL: objects=24, vertices: 67,402 triangles: 125,691

--- TECHNICAL DETAILS ---

Textures: 2K PBR workflow (can be downscaled in Unity for optimization).

Optimization: Low poly meshes optimized for real-time performance.

Setup: Prefabs are pre-configured; just place them in your hierarchy.

Texture resolution: 2048x2048

Texture maps included: Albedo (Base Color), Normal Map

Materials: 1 material per mesh (optimized for performance)

UVs: Non-overlapping, optimized for game use

--- IMPORTANT ---

To interact with the sample demo, make sure the new Input System package is installed and enabled before importing the package.

You can install it from the Package Manager by going to Window > Package Manager, then searching for and installing the “Input System” package.

After installation, Unity will prompt you to enable the new Input System. Click “Yes” and allow Unity to restart.

You can also enable it manually by going to Edit > Project Settings > Player > Active Input Handling, then selecting either “Input System Package (New)” or “Both” for compatibility.

--- SUPPORT & CONTACT ---

If you have any questions or need support, please contact:

Email: hodamoghim@gmail.com

If you find this asset useful, please leave a review on the Unity Asset Store.

Your feedback is greatly appreciated!
